

## DISTRIBUTION OF MATERIALS

Distribution of Non-School Related Materials

There are a great many worthy undertakings in the Rice Lake Area School District (RLASD), which understandably deserve public support. However, it is the policy of the Board of Education to only send home with students certain non-school-related information regarding community activities/programs, which are for public school-age students if (1) the requestor and information meets the criteria set forth below in the procedure section, (2) the person requesting to send the information home through the schools follows the procedure for the distribution of the material; and (3) the distribution does not interfere with classroom instruction.

Although the primary purpose of the distribution of non-school-related materials under this policy is to provide information to parents/guardians about community programs and activities for students, pupils will also regularly read and review the materials. All content must be appropriate for pupils.

This policy and its related procedure do not apply to RLASD sponsored activities or school-related groups.

This Board of Education policy concerning the distribution of non-school-related materials and its related Board of Education procedure creates an expressly limited forum for the distribution of materials through the schools.
